Note

This guide reorganizes and explains the Football.com Nigeria football help page. The page is primarily a market settlement glossary and rules page. It does not explain account steps for placing a bet, single vs. multiple bet slips, or odds formats/calculation. Those topics are not described on the source page, so they are not added here. Market descriptions below follow the source, with plain-language explanations.

Football

General Rules

Most football markets, except halftime and first-half markets, overtime, and penalty shootouts, are settled on regular time plus injury/stoppage time. Unless a specific market says otherwise, extra time and penalty shootouts do not count.

A market labelled regular 90 minutes means the score at the end of scheduled 90 minutes, including stoppage time but excluding extra time, a penalty shootout, and golden goal.

If play is interrupted but resumes within 48 hours of the original kickoff, open bets settle using the final result. If it does not resume within 48 hours, undecided bets are void. The operator reserves a right to void bets where the market remained open after a goal, red/yellow-red card, or penalty; where red-card data was missing or wrong; where listed match time was wrong by more than five minutes; where an incorrect score was displayed (markets during that interval may be cancelled); where team names or competition/category were wrong; or in VAR-related score, card, corner, or penalty changes.

Plain English: check the time period named by the market. A full-time market normally stops at 90 minutes plus stoppage time, even if the match later goes to extra time or penalties. A qualifying interruption within 48 hours does not automatically void open bets.

Corners

Only corners actually taken count. A corner awarded but never taken does not count. Timing is based on when the kick is taken, not when it is awarded or when a data feed records the award.

How to use this rule: for a corner count, corner interval, or next-corner selection, the kick itself is the event that matters.

Bookings

A yellow card counts as one booking, and a red or yellow-red card counts as two. The second yellow that produces a yellow-red is not counted separately, so one player can contribute no more than three bookings. Booking points use a different scale: yellow is 10 points, red or yellow-red is 25 points, and the second yellow is not counted separately, so one player can contribute at most 35 points. Settlement uses available evidence of cards shown during regular 90 minutes. Cards after the match do not count; cards shown during halftime count in the second half. Cards to non-players, including substituted players, managers, and bench players, do not count.

Plain English: booking counts and booking points are different markets. Read which measure the selection uses before comparing a result to a line.

Football Statistics

Markets for shots, shots on target, saves, fouls, throw-ins, goal kicks, offsides, and woodwork hits are settled exclusively from Opta data. Opta definitions may differ from a league or governing body's definitions.

Player Markets

A player market is normally valid if the selected player appears at any point, either starting or as a substitute. Playing time does not change that validity rule. If the player does not participate, bets are void. Exception: Player Shots on Goal (including overtime), Player H2H (including overtime), Player Shots (including overtime), Player Assists (including overtime), Player Tackles (including overtime), Player Passes (including overtime), and Player To Be Carded (including overtime) are void if the player does not start.

Anytime Goalscorer and Player to Score X or More

Own goals do not count. Players who have taken part since kickoff or since the previous goal are runners; players currently participating are listed. If an unlisted player scores, bets on listed players stand. Non-fielders (not named in the matchday squad) and unused substitutes are void. Settlement is based on the TV insert and Press Association statistics unless there is clear evidence they are incorrect.

Plain English: this is a player-to-score market, not a team-goal market. An own goal is excluded, and the source distinguishes starters/participants from unused bench players.

First Goalscorer

Own goals are ignored. Players who have participated since kickoff or the previous goal are runners and current participants are listed. If an unlisted player scores, listed-player bets stand. Non-fielders and unused substitutes are void. A late substitute who enters after the first goal is also void. Settlement uses TV and Press Association statistics unless clearly wrong.

Player Assists

An assist is a player's final contribution, such as a pass, shot, or other touch, leading to a teammate's goal. It may be excluded if an opponent's deflection materially changes the ball's path and the recipient was unlikely to receive it otherwise. No assist is awarded for an own goal, penalty, direct corner goal, or direct free-kick goal.

Player Goals

Counts goals scored into the opponent's net by that player. A shot deflected into the net by an opponent may be treated as an own goal and not credited to the shooter.

Player Total Shots

A shot is a clear attempt to score, whether on target, off target, blocked, saved, or hitting the frame. Blocked shots by any player count. A set-piece or cross/flick-on without clear intent to score does not count unless it directly produces a goal. Any legal body part may be used.

Player Total Shots On Goal

Counts an attempt that directly scores, or a clear goal attempt that would have gone in but for a goalkeeper save or a last-man stop when the goalkeeper could not save it. A shot hitting the frame and going straight in counts; hitting the frame and staying out does not. Blocks by anyone other than the last man do not count. Non-shooting set pieces, crosses, and flick-ons do not count unless they directly score. Any legal body part may be used.

Player Total Passes

Counts attempted passes, successful or not, intended to find a teammate. Open-play passes and short-played goal kicks, free kicks, and corners count. Crosses, throw-ins, and goalkeeper throws do not. Any legal body part may be used.

Player Total Tackles

A successful ground challenge that connects with the ball and takes it from a player in possession counts, regardless of who gains possession afterward or whether it goes out. Missed tackles, aerial duels, fouls, and interceptions do not count. The opponent must clearly have been in possession.

Player Saves

Predict the goalkeeper's total saves. A save is recorded when the goalkeeper intercepts or stops a shot on target.

Posts and Crossbars Markets

A shot that hits the post or crossbar and then goes in counts as a goal, not as woodwork.

Interval Markets

Goal time follows the TV announcement when available, otherwise the match clock. A goal is timed when the ball crosses the line, not when it is kicked. Corners are timed when taken, cards when shown, offsides and penalties when the referee makes the decision. These timing rules also apply to VAR situations. A penalty awarded but not taken does not count. For 5, 10, or 15 minute interval markets covering 41-45, 31-40, or 31-45 minutes, events in added time count.

Next Scoring Type

Freekick: scored directly from the free kick or corner; a deflection still qualifies if the taker is awarded the goal. Penalty: must be scored directly, not from a rebound after a miss. Own Goal: officially declared own goal. Header: scorer's last touch is with the head. Shot: scored with another body part and not qualifying as another type. No Goal: no goal occurs.

Match-result and goal markets

The source page lists many individual market headings. The following compact catalogue keeps every listed selection name and explains its meaning in ordinary language. “Regular time” means the page's 90 minutes plus stoppage-time definition unless the market explicitly names a half, overtime, or shootout.

1X2 and early-lead markets

1X2: choose home win (1), draw (X), or away win (2); overtime is excluded.

1UP: your chosen team is paid as a winner as soon as it takes a one-goal lead, such as 1-0 or 2-1; later score is irrelevant after settlement. Draw selection is settled like ordinary 1X2 on the full-time result, which is why its odds are the same.

2UP: your team is paid when it leads by two, such as 2-0, 0-2, 3-1, or 1-3. If abandoned after the team has led by two or more, that selection still wins.

1X2 - Never Down: selected team must win without ever trailing. If it falls behind at any point or does not win, it loses. If abandoned after it has trailed, it loses. The operator reserves a right to void for integrity issues or abusive behaviour.

Any team 3UP, Home team 3UP, Away team 3UP, Home team 2UP, Away team 2UP, Home team 1UP, Away team 1UP: predict whether that team (or either team) reaches the named lead at any point.

Double Chance: combine two of the three 1X2 outcomes: 1X (home or draw), X2 (draw or away), or 12 (either team wins, no draw).

Double Chance 1UP: home-or-draw is paid early if home leads; draw-or-away is paid early if away leads. Once paid, final score is irrelevant. If the early condition is not met, it settles as ordinary double chance.

Draw No Bet: choose the match winner; a draw voids the selection.

Home No Bet and Away No Bet: source describes a regular-time result market with the named team's win selection voided. The page's wording is unusual, so read the actual ticket selection carefully.

Handicap: choose the winner after applying the displayed handicap to the regular-time result.

Asian Handicap: same idea, with quarter, half, and whole-goal lines. Quarter lines can produce win, loss, half-win, or half-loss with the other half stake returned; half lines produce win or loss; whole lines can be win, loss, or void.

Handicap settlement table

The first three columns show a team giving a handicap (negative line); the last three show the team receiving the equivalent positive head start. “Void” returns the stake. “Half win” and “half lose” apply to half the stake, with the other half void/returned. Team result is measured before applying the handicap.

HANDICAP	TEAM RESULT	BET RESULT	HANDICAP	TEAM RESULT	BET RESULT
0	Win	Win	0	Win	Win
0	Draw	Void	0	Draw	Void
0	Lose	Lose	0	Lose	Lose
-0.25	Win	Win	+0.25	Win	Win
-0.25	Draw	Half lose	+0.25	Draw	Half win
-0.25	Lose	Lose	+0.25	Lose	Lose
-0.5	Win	Win	+0.5	Win	Win
-0.5	Draw	Lose	+0.5	Draw	Win
-0.5	Lose	Lose	+0.5	Lose	Lose
-0.75	Win by 2+	Win	+0.75	Win	Win
-0.75	Win by 1	Half win	+0.75	Draw	Win
-0.75	Draw	Lose	+0.75	Lose by 1	Half lose
-0.75	Lose	Lose	+0.75	Lose by 2+	Lose
-1	Win by 2+	Win	+1	Win	Win
-1	Win by 1	Void	+1	Draw	Win
-1	Draw	Lose	+1	Lose by 1	Void
-1	Lose	Lose	+1	Lose by 2+	Lose
-1.25	Win by 2+	Win	+1.25	Win	Win
-1.25	Win by 1	Half lose	+1.25	Draw	Win

HANDICAP	TEAM RESULT	BET RESULT	HANDICAP	TEAM RESULT	BET RESULT
-1.25	Draw	Lose	+1.25	Lose by 1	Half win
-1.25	Lose	Lose	+1.25	Lose by 2+	Lose
-1.5	Win by 2+	Win	+1.5	Win	Win
-1.5	Win by 1	Lose	+1.5	Draw	Win
-1.5	Draw	Lose	+1.5	Lose by 1	Win
-1.5	Lose	Lose	+1.5	Lose by 2+	Lose
-1.75	Win by 3+	Win	+1.75	Win	Win
-1.75	Win by 2	Half win	+1.75	Draw	Win
-1.75	Win by 1	Lose	+1.75	Lose by 1	Win
-1.75	Draw	Lose	+1.75	Lose by 2	Half lose
-1.75	Lose	Lose	+1.75	Lose by 3+	Lose
-2	Win by 3+	Win	+2	Win	Win
-2	Win by 2	Void	+2	Draw	Win
-2	Win by 1	Lose	+2	Lose by 1	Win
-2	Draw	Lose	+2	Lose by 2	Void
-2	Lose	Lose	+2	Lose by 3+	Lose

How to read the table: a negative handicap makes the selected team “give” goals, so it must win by enough to overcome the line. A positive handicap gives that team a virtual head start. Quarter and whole-number lines can split or return stake on exact margins. The paired columns let a bettor see the outcome for either side of the same line.

Over/Under and goal totals

Over/Under: predict whether total regular-time goals finish above or below a line. Half-goal lines cannot push; whole-goal lines can push (void); quarter lines split the stake across adjacent half-lines. Home Team Over/Under and Away Team Over/Under count only that named team's goals.

Over/Under EarlyGoals: over 1.5 is paid early at one goal by 10 minutes; over 2.5 at two goals by 30 minutes; over 3.5 at three goals by 50 minutes. If early threshold is not met, it becomes an ordinary over/under bet.

Home/Away Over/Under EarlyGoals: source text says “1UP pays your 1X2 bets immediately if your team takes a one goal lead,” then says if that condition is not met the selection is treated as normal 1X2. This wording appears inconsistent with the heading, so it is preserved as published rather than silently corrected.

GG/NG: predict whether both teams score (Yes/GG) or at least one team does not (No/NG).

Over/Under settlement table

The table shows the total-goal count and settlement for a selection on Over or Under at each line. A half win/loss applies to half the stake and the rest is returned; void returns the full stake. The two outcome columns show the opposite settlement for the Over and Under sides.

LINE	TOTAL GOALS	OVER BET	UNDER BET
0.5	0	Lose	Win
0.5	1+	Win	Lose
0.75	0	Lose	Win
0.75	1	Half win	Half lose
0.75	2+	Win	Lose
1	0	Lose	Win
1	1	Void	Void
1	2+	Win	Lose
1.25	0	Lose	Win
1.25	1	Half lose	Half win
1.25	2+	Win	Lose
1.5	0 or 1	Lose	Win
1.5	2+	Win	Lose
1.75	0 or 1	Lose	Win
1.75	2	Half win	Half lose
1.75	3+	Win	Lose
2	0 or 1	Lose	Win
2	2	Void	Void
2	3+	Win	Lose
2.25	0 or 1	Lose	Win
2.25	2	Half lose	Half win
2.25	3+	Win	Lose
2.5	0 to 2	Lose	Win
2.5	3+	Win	Lose
2.75	0 to 2	Lose	Win

LINE	TOTAL GOALS	OVER BET	UNDER BET
2.75	3	Half win	Half lose
2.75	4+	Win	Lose
3	0 to 2	Lose	Win
3	3	Void	Void
3	4+	Win	Lose

How to use it: for 2.5 goals, three or more goals wins Over and zero to two wins Under. At 2.0, exactly two goals voids both sides. Quarter lines such as 2.25 and 2.75 split the stake, producing half settlements at the boundary. This table is a quick comparison of the two opposing selections, not odds or a payout quote.

Other match and scoring markets

To Qualify: choose which team advances to the next round. Exact Goals: choose the exact regular-time goal total. Will There Be Overtime: predict whether extra time is played. Goal Range: choose a band for total goals. Odd/Even: choose the parity of total goals; zero goals counts as even. Winning Margin: choose the winner's goal margin. Teams to Score: choose which team scores.

1X2 & GG/NG: choose match result and whether both teams score. Over/Under & GG/NG: choose total-goal side and both-teams-to-score result. 1X2 & Over/Under: combine match result and total-goal side. 1st/2nd Half GG/NG: both teams score in the named half. Nth Goalscorer: choose the player scoring the numbered goal; own goals do not count. Correct Score: exact regular-time score. Half Time/Full Time: halftime result plus full-time regular-time result. Winning Method: winner and method; multi-leg ties use aggregate result.

Double Chance & GG/NG and Double Chance & Over/Under combine a two-outcome match-result choice with the named scoring condition. Next Goal and Last Goal predict the team scoring the next or final goal. When Will the Nth Goal Be Scored (10 min interval) predicts the interval for that numbered goal. 5/10/15 minutes - Nth Goal from a to b predicts the team scoring the numbered goal inside that interval. 5/10/15 minutes - Over/Under from a to b predicts total goals in that interval.

Overtime & Goal: predict whether overtime is played and whether it contains a goal; source says Yes means overtime and a goal, No means no overtime or no overtime goal. Overtime - 1X2: overtime winner. Overtime - Nth Goal: team scoring a numbered overtime goal. Overtime - Over/Under: overtime goal total against a line. Overtime - Handicap: overtime result after handicap. Overtime - Correct Score: exact overtime score.

Penalty Shootout - Winning Margin: winning margin in the shootout. Penalty Shootout - Over/Under: total shootout goals against a line. Penalty Shootout - Exact Goals: exact shootout goal total. Penalty Shootout - Odd/Even: parity of shootout goals. Penalty Shootout - Nth Penalty Scored and Nth Penalty Scored: predict whether the numbered penalty is scored. Penalty Shootout - Nth Goal: team scoring the numbered shootout goal. Penalty Shootout - Home Over/Under and Away Over/Under: each team's shootout goals against a line. Penalty Shootout - Home Odd/Even and Away Odd/Even: parity of each team's shootout goals; zero counts even. Penalty Shootout - Correct Score: exact shootout score. Penalty Shootout - Winner: choose the shootout winner. Penalty Shootout - Winner & Over/Under combines winner with total shootout goals.

Home Team Exact Goals and Away Team Exact Goals: exact regular-time goals for that team. Home Team Odd/Even and Away Team Odd/Even: parity of that team's regular-time goals; zero is even. Home Team Clean Sheet and Away Team Clean Sheet: whether the named side concedes none. Last Goalscorer: player scoring the final regular-time goal; own goals excluded. Multigoals: total-goal band. Home Multigoals and Away Multigoals: named team's goal band. Multiscores: final regular-time result.

1st Half - Multigoals and 2nd Half - Multigoals: goal band for that half. Home Team to Score Both Halves and Away Team to Score Both Halves: whether that side scores in each half. Both Halves Over x.5 and Both Halves Under x.5: whether each half's goal total is above or below the line. 1st Half - Home Team Over/Under and 1st Half - Away Team Over/Under: named team's first-half goal total. 1st Half - Exact Goals, 1st Half - Home Team Exact Goals, and 1st Half - Away Team Exact Goals: exact first-half totals. 1st half - Odd/Even: first-half total parity, zero even. 1st Half - GG/NG: both teams score in the first half. 1st half - Home Team Clean Sheet and 1st half - Away Team Clean Sheet: whether the named side concedes in that half. Player Assists and Player Goals: whether the selected player gets an assist or scores in regular time. 1st Half - Correct Score: exact first-half score.

2nd Half - Nth Goal: team scoring the numbered second-half goal. 2nd Half - Home Team Over/Under and 2nd Half - Away Team Over/Under: named team's second-half goal total against a line. 2nd Half - Exact Goals: exact second-half total. 2nd Half - Odd/Even: second-half total parity, zero even. 2nd half - GG/NG: both teams score in second half. 2nd Half - Home Team Clean Sheet and 2nd Half - Away Team Clean Sheet: whether named side concedes in second half. 2nd Half - Correct Score: exact second-half score.

Overtime 1st Half - 1X2: result in the first half of overtime. Overtime 1st Half - Handicap: first-half overtime result after handicap. Overtime 1st Half - Correct Score: exact score in the first overtime half. Half Time/Full Time Correct Score: exact halftime score and regular-time final result. Home Team to Win Both Halves and Away Team to Win Both Halves: named side scores more than the opponent in each half. Home Team to Win Either Half and Away Team to Win Either Half: named side wins at least one half. Highest Scoring Half: which half has more goals. Home Team Highest Scoring Half and Away Team Highest Scoring Half: which half has more goals for the named side.

Double Chance & 1st Half GG/NG and Double Chance & 2nd Half GG/NG: full-match double chance combined with both-teams-score in the named half. 1st Half - Double Chance & GG/NG: first-half double chance and both-teams-score in the first half. 2nd Half - 1X2 & GG/NG and 2nd Half - 1X2 & Over/Under: second-half result combined with scoring condition. 2nd Half - Double Chance & GG/NG: second-half double chance and both-teams-score. 1st Half - 1X2: first-half winner. 1st Half - Which Team Will Win the Rest: winner of the remaining first-half play, ignoring current score. 1st Half - Nth Goal: team scoring the numbered first-half goal. 1st Half - Double Chance: first-half 1X, X2, or 12. 1st Half - Draw No Bet: first-half winner, draw void. 1st Half - Handicap: first-half result after handicap. 1st Half - Over/Under: first-half total against a line. 1st Half - 1X2 & GG/NG and 1st Half - 1X2 & Over/Under: first-half result combined with the named scoring condition.

2nd Half - 1X2: second-half winner. 2nd Half - Double Chance: second-half 1X, X2, or 12. 2nd Half - Draw No Bet: second-half winner, draw void. 2nd Half - Handicap: second-half result after handicap. 2nd Half - Over/Under: second-half goal total against a line. 5/10/15 minutes - 1X2 from a to b: result in that interval. Overtime - Which Team Will Win the Rest: result for the remaining overtime. Nth Goal & 1X2: team scoring numbered goal plus match winner. Home Team to Win to Nill and Away Team to Win to Nill: named team wins without conceding. Anytime Goalscorer: listed player scores in regular time, own goals excluded. Rest Match Winner: result for remainder of regular time, ignoring current score.

Half Time/Full Time & Over/Under combines halftime result, regular-time result, and full-time goal total. Half Time/Full Time & 1st Half Over/Under combines halftime result and full-time result with first-half goal total. Half Time/Full Time & Exact Goals adds exact regular-time total. Home Team or Over Goals, Home Team or Under Goals, Draw or Over Goals, Draw or Under Goals, Away Team or Over Goals, and Away Team or Under Goals win if either named result condition or goal-total condition is true. Home Team or GG/NG, Draw or GG/NG, and Away Team or GG/NG similarly combine the named match outcome with whether both teams score; the page's Draw or GG/NG description says “Home team will win or both teams will score,” which appears inconsistent, so it is retained as published.

Goal Bounds, Goal Bounds - Home, and Goal Bounds - Away: choose a goal-count range for both teams or for the named team.

Home Team or Any Clean Sheet, Draw or Any Clean Sheet, and Away Team or Any Clean Sheet combine the named match result with whether either team keeps a clean sheet.

1 minute - Over/Under from a to b: goal count in a one-minute interval against a line. 1 minute - Over/Under Corners from a to b: corner count. 1 minute - Over/Under Bookings from a to b: booking count. 1 minute - Over/Under Offsides from a to b: offside count. 1 minute - Over/Under Penalties from a to b: penalty count.

Booking markets

Booking 1X2: which team receives more bookings in regular time. Nth Booking: team receiving the numbered booking. Total Booking Points: total points over/under a line, using yellow 10 and red 25 points. Total Bookings: total booking count over/under a line, using yellow 1 and red 2. Home Team Total Bookings and Away Team Total Bookings: same count for the named team. Exact Bookings: exact total count; Home Team Exact Bookings and Away Team Exact Bookings: exact named-team count. Booking Point Range: choose a range for booking points. Sending Off, Home Team Sending Off, and Away Team Sending Off: whether any player, home player, or away player is sent off.

First-half booking equivalents: 1st Half - Booking 1X2, 1st Half - Nth Booking, 1st Half - Total Booking Points, 1st Half - Total Bookings, 1st Half - Home Team Total Bookings, 1st Half - Away Team Total Bookings, 1st Half - Exact Bookings, 1st Half - Home Team Exact Bookings, 1st Half - Away Team Exact Bookings, 1st Half - Booking Point Range, 1st Half - Sending Off, 1st Half - Home Team Sending Off, and 1st Half - Away Team Sending Off all apply the same concept to the first half. The source repeats yellow/red counting rules for these markets; the second yellow leading to red is not counted separately.

Interval booking markets: 5/10/15 minutes - Booking 1X2 from a to b selects which team gets more bookings in the interval. 5/10/15 minutes - Total Bookings from a to b uses an over/under line for bookings. 5/10/15 minutes - Sending Off from a to b, Home Team Sending Off from a to b, and Away Team Sending Off from a to b predict a dismissal in the interval for either side or the named side.

Corner markets

Corners - 1X2: which team gets most regular-time corners. Nth Corner: team taking the numbered corner. Last Corner: team taking the last corner. Corner Handicap: most corners after applying handicap. Corners - Over/Under: total corner count against a line. Home Team Corners - Over/Under and Away Team Corners - Over/Under: named-team count against a line. Corner Range, Home Team Corner Range, and Away Team

Corner Range: choose a band for total or named-team awarded corners. Odd/Even Corners: parity of total corners, with zero even.

First-half corner equivalents: 1st Half - Corner 1X2, 1st Half - Nth Corner, 1st Half - Last Corner, 1st Half - Corner Handicap, 1st Half Corners - Over/Under, 1st Half - Home Corners Over/Under, 1st Half - Away Corners Over/Under, 1st Half - Home Exact Corners, 1st Half - Away Exact Corners, 1st Half - Corner Range, and 1st Half - Odd/Even Corners. They apply the named count or result to the first half.

Corner interval markets: 5/10/15 minutes - Corners 1X2 from a to b selects which team gets more corners. 5/10/15 minutes - Xth Corner from a to b selects the team taking the numbered corner. 5/10/15 minutes - Corner Handicap from a to b applies a handicap to corner count. 5/10/15 minutes - Corners - Over/Under from a to b, Home Corners - Over/Under from a to b, and Away Corners - Over/Under from a to b apply a total or team corner line. 5/10/15 minutes - Odd/Even Corners from a to b predicts parity, zero even. Race to X Corners and 1st Half - Race to X Corners predict which team reaches the specified corner count first in the full match or first half.

Source coverage and limitations

The page extraction contained the “Football” and “Player Markets” sections, the two complete settlement tables reproduced above, and 241 headings/body entries in total. It exposed no linked article pages under the same help path and no hidden accordion or tab content. The page does not provide a how-to-place-a-bet walkthrough, single/multiple bet definitions, or an explanation of odds formats, despite those being common betting-guide topics.
