PREDICT — MARKET INTELLIGENCE

The Market Handbook

Every football market on football.com — decoded, settled, and mapped to the plays we actually make.

Compiled from a full study of the official football.com and SportyBet manuals and live market catalogues, 7 November 2026.

Know the market before the money moves.

Compiled 2026-11-07 by Phoenix (Predict agent) from a full end-to-end study: both official manuals read completely (football.com "How to Play — Football" and the SportyBet Nigeria football manual — the same document family, near word-for-word), plus a live market catalogue of Arsenal vs Hull City (Premier League, in-play) and a pre-match catalogue of Parma vs Bologna (Serie A). The source manuals are archived in `docs/manuals/`. This handbook is written in our own words from that study; where the manuals are silent, it says so. Coverage is A–Z: §16 indexes **every market heading in both manuals** (268 headings, machine-checked against the manual texts), and the manuals' own settlement tables are carried in full in §4 and §6.

---

1. The five laws everything else obeys

1. **Regular time is the default universe.** Unless a market says otherwise, it is settled on the 90 minutes plus injury time. Extra time and penalty shootouts do not count.
2. **Goal time = when the ball crosses the line**, as announced by TV (else the match clock) — not when the shot was taken. Corner time = when the kick is taken. Booking time = when the card is shown. Offside/penalty time = when the referee decides.
3. **Statistics settle on Opta data** — shots, shots on target, fouls, offsides, tackles, saves, woodwork. Opta's definitions can differ from a league's own.
4. **Dead markets die.** If a match is interrupted and not finished within 48 hours of the original kickoff, undecided bets are void. Bets taken at a wrong displayed score, a wrong match clock (off by more than 5 minutes), or on an event that had already happened can be voided by the bookmaker.
5. **Pre-match and live are two different shops.** Whole market families exist on one side only (see §12). Anything involving minutes is a live-only product.

2. How to read a market name — the two numbers

Every time-based market carries **two different numbers doing two different jobs**:

- The **window** — in the market's title: `from 1 to 15`, `from 46 to 60`. This is minutes.
- The **line** — on the selection: `0.5`, `2.5`. In a goals market this counts **goals**, never minutes.

Read in full, "Under 0.5" inside a market titled `15 minutes - Over/Under from 1 to 15` means under 0.5 goals in minutes 1–15 — i.e. no goal in the first fifteen minutes. Confusing the window with the line is the single most expensive reading error on this site; this handbook exists because of it.

3. The early no-goal family — the owner's core plays

The play: neither team scores inside the opening window. Three windows matter: 5, 10, 15 minutes. Each has **two equivalent doors** on football.com, both **live-only** — they appear at kickoff and the opening window vanishes the moment it ends.

Play	Door A — interval 1st-goal market	Selection	Door B — interval totals market	Selection
No goal in first 5 min	`5 minutes - 1st goal from 1 to 5`	**None**	`5 minutes - Over/Under from 1 to 5`	**Under 0.5**
		None		

Play	Door A — interval 1st-goal market	Selection	Door B — interval totals market	Selection
No goal in first 10 min	`10 minutes - 1st goal from 1 to 10`		`10 minutes - Over/Under from 1 to 10`	**Under 0.5**
No goal in first 15 min	`15 minutes - 1st goal from 1 to 15`	**None**	`15 minutes - Over/Under from 1 to 15`	**Under 0.5**

How each door works:

- **Door A ("…minutes - 1st goal from a to b")** offers Home / **None** / Away: which team scores the first goal inside that window — or nobody (**None**). The manual's one-line definition covers the Nth-goal interval family ("predict which team will score the Nth goal within a time interval"); the None option itself is never defined in either manual — its meaning is fixed by the market's structure, and it is confirmed by live prices (the None price in a window matches the Under 0.5 price for the same window, e.g. both 1.27 for minutes 41–50 on Arsenal vs Hull).
- **Door B ("…minutes - Over/Under from a to b")** is the same bet in totals language: the manual defines it as the total goals inside a 5/10/15-minute interval measured against a line, and the 0.5 line can only mean zero goals (see §4). In the observed live pages, 0.5 was the only line offered in these interval totals.
- A near neighbour that is **not** the same bet: `…minutes - 1X2 from a to b` → **Draw**. A level window includes 1–1 inside the window; the owner's play loses on any goal. Use Doors A/B for the pure play.

Operating facts (verified live):

- The windows **roll**. Only the current block is listed: at half-time of Arsenal vs Hull the 15-minute 1X2 showed `from 46 to 60`, the 5-minute showed `from 46 to 50`, and the 10-minute 1st-goal showed `from 41 to 50`. At kickoff they read `from 1 to 5 / 1 to 10 / 1 to 15`.
- The 10-minute 1X2 is a different animal: one market named `1X2 - Intervals of 10 Minutes` whose row is cumulative ("1 to 50 Minutes", then "1 to 60 Minutes") — the 1X2 of the whole score from minute 1 to the next 10-minute boundary. It is not a set of slices.
- There are also cumulative totals, live only: `Total Goals Over/Under from 1 to X minute` (X = 50, 55, … 85 in repeated groups; the first group was verified as the 0.5 line — "no goal at all by minute X" is Under 0.5 there).
- **League/feed dependence:** minute markets are not universal. A live Botola Pro match observed the same day (Kawkab vs Wydad) had an empty Minutes tab and no interval markets at all. Always confirm the family exists on the specific match before planning a play.
- **Injury time at interval boundaries (manual, Interval Markets):** for the intervals that run into a half's end — 41–45, 31–40, 31–45 — events (goals, corners) scored in added injury/ stoppage time **count inside that interval**. Interval timing always follows the event definitions of Law 2: goals by ball-crossing time, corners by taken time, bookings by card-shown time, offsides and penalties by the referee's decision (VAR included). A penalty **awarded but not taken** is not considered.
- Pre-match, the Minutes tab holds exactly **two** markets: the first-goal interval markets of §5. Nothing else. Any plan that needs a window market is a live-betting plan.

Measured base rates (our research, for calibration): across big-league football, roughly 93% of matches are goalless at 5′, ~81% at 10′, ~69–71% at 15′ — before adjusting for the two teams' expected goals. The Predict engine prices each match individually (`src/predict_agent/`

`early_goals.py`: P(no goal by t) = exp(−λ_match × F(t)) with the empirical goal-timing curve F(5)=0.032, F(10)=0.072, F(15)=0.128).

4. Over/Under — the lines, settled

The manual's definition, paraphrased: predict whether the total goals in regular time finish over or under a given line. Lines come in three kinds, and the kind decides the settlement:

Line kind	Examples	Possible settlements
Half lines	0.5, 1.5, 2.5, 3.5	Win or lose only — no refunds
Whole lines	1, 2, 3	Win, lose, or **void** (stake back) if the total lands exactly on the line
Quarter lines	0.75, 1.25, 2.25, 2.75	The stake splits across the two neighbouring lines: win, lose, half-win, or half-lose

The manual's Over/Under settlement table — in full. Every line the book offers, every total-goals outcome, both sides. (Regular time totals; the same grid settles any scoped version — team, half, interval — inside its own scope.)

Line	Total goals	Over settles	Under settles
0.5	0	Lose	**Win**
0.5	1+	**Win**	Lose
0.75	0	Lose	**Win**
0.75	1	Half win	Half lose
0.75	2+	**Win**	Lose
1.0	0	Lose	**Win**
1.0	1	Void	Void
1.0	2+	**Win**	Lose
1.25	0	Lose	**Win**
1.25	1	Half lose	Half win
1.25	2+	**Win**	Lose
1.5	0–1	Lose	**Win**
1.5	2+	**Win**	Lose
1.75	0–1	Lose	**Win**
1.75	2	Half win	Half lose
1.75	3+	**Win**	Lose
2.0	0–1	Lose	**Win**
2.0	2	Void	Void
2.0	3+	**Win**	Lose
2.25	0–1	Lose	**Win**

Line	Total goals	Over settles	Under settles
2.25	2	Half lose	Half win
2.25	3+	**Win**	Lose
2.5	0–2	Lose	**Win**
2.5	3+	**Win**	Lose
2.75	0–2	Lose	**Win**
2.75	3	Half win	Half lose
2.75	4+	**Win**	Lose
3.0	0–2	Lose	**Win**
3.0	3	Void	Void
3.0	4+	**Win**	Lose

Read the owner's core play off this grid: line **0.5**, total **0** → Under wins. Under 0.5 on a full match is a bet on 0–0; Under 0.5 inside a `from 1 to 15` window is the no-goal play of §3.

The same line logic applies inside any scope the market names: full match, one team (Home/Away Team Over/Under), one half, or one interval window (§3, Door B). Scope is always in the market title; the line is always the count.

5. The two "None"s — and the first-goal timing markets

The word **None** appears as a selection in two unrelated places, and confusing them is expensive:

Where you see "None"	What it means	Settles
Interval 1st-goal markets — `…minutes - 1st goal from a to b` (Home / None / Away)	**No goal inside that window**	When the window ends
`When will the 1st goal be scored (15 min interval)` / `(10 min interval)` — options 1-15, 16-30, …, 76-90, None	**No goal in the entire match** (0–0 full time)	Full time

`When will the 1st goal be scored` is the **only** early-timing market sold **pre-match** (Minutes tab). Its options are windows in which a goal is scored — the opposite direction from the owner's play — plus None for a goalless match. Live, the elapsed windows show as locked while the rest keep pricing. Observed pre-match (Parma vs Bologna): 15-min version — 1-15 @3.40, 16-30 @4.20, 31-45 @5.10, 46-60 @8.40, 61-75 @12.00, 76-90 @14.00, None @9.70; 10-min version — 1-10 @4.90 stepping to 81-90 @19.50, None @9.60.

Neither manual defines this market family beyond a single line for the 10-minute Nth-goal version ("predict at which time interval (10 mins) the Nth goal will be scored"), and neither manual contains the word "None" at all. The meanings above are fixed by market structure and were verified against live pricing behaviour (the whole-match None shortened from 32.00 pre-match to ~6.50 at half-time of a 0–0 match — exactly how a 0–0-full-time price behaves).

Related goal-timing markets:

- **1st Goal** (Main tab): Home / None / Away — which side scores the match's first goal, or nobody. The manual has no heading for this market; the site's separate **Next Goal** rule states

that if the named goal is never scored, those bets are void — a different treatment from a None selection, so do not blend the two in your head.

- **Next Goal / Last Goal:** which team scores the Nth / the last goal of the match.
- **Next Scoring Type:** the kind of the next goal. The manual defines each type exactly, and two of the definitions surprise:

Scoring type	The manual's test
Free kick	Scored **directly** from a free kick **or a corner**; a deflected shot still counts if the taker is awarded the goal
Penalty	Scored **directly** from the penalty — a goal from the **rebound of a missed penalty does not count**
Own goal	The goal is declared an own goal
Header	The scorer's **last touch** is with the head
Shot	Any other body part, where none of the above apply
No Goal	No further goal is scored

6. The core result markets

Market	Meaning	Settlement notes
1X2	Home win / Draw / Away win in regular time	The base market. Variants below change when it settles
1X2 — 1UP	Your team is paid as a winner the moment it leads by 1 goal	Once settled, the final score is irrelevant. Draw selections settle like normal 1X2
1X2 — 2UP	Paid as a winner the moment your team leads by 2 goals	Same early-settlement logic; still paid if the match is later abandoned with the 2-goal lead
1X2 — NeverDown	Your team must win **without ever trailing**	Going behind at any point loses the bet, even in a comeback win. football.com also sells team versions (Home/Away 1UP, 2UP, 3UP) and Double Chance 1UP
DrawSave (football.com)	The **Draw** selection wins if the score is level at the 90th minute — and still wins on any full-time draw	Singles and multiples only; if your team led by 1+ the draw option stays "live" only until the 60th minute per the manual text
Double Chance	1X (home or draw), 12 (either team wins), X2 (draw or away)	Two of the three outcomes in one selection
Draw No Bet	Pick the winner; a draw voids the bet	Stake refunded on a draw
Home No Bet / Away No Bet	Pick the result; if the named side wins, the bet voids	Mirror-image insurance markets
European Handicap (3-way)	A goal start (+/−) is added to a team's score, then 1X2 is settled on the adjusted score	Three outcomes, no refunds; the handicap is part of the score

Market	Meaning	Settlement notes
Asian Handicap	Handicap with split lines (0, ±0.25, ±0.5, ±0.75, ±1…)	Draws can refund (line 0), half-refund (quarter lines). E.g. −0.25: win by 1+ = full win, draw = half stake back, lose = full loss
Correct Score	The exact full-time score	Usually a 8–16% shot even for the likeliest line — price accordingly
Half Time / Full Time	The result at half-time **and** at full-time, as one selection (e.g. Draw/Home)	Only the HT/FT Correct Score variant exists pre-match on football.com; there is no plain HT/FT 1X2 there
GG/NG (Both Teams To Score)	Yes = both teams score at least once; No = at least one team fails to score	Also GG/NG 2+ (both score 2+), and 1st-half versions
Exact Goals	The exact total number of goals (0, 1, 2, 3, 4, 5+)	Live Main tab on football.com; also per-team and per-half
Odd/Even	Total goals odd or even — **zero goals counts as even**	Per match, per team, per half
Goal Range / Goal Bounds	Total goals fall inside a chosen band (e.g. 1–2, 2–4, 0–3)	"Excluded Number of Goals" is the inverse idea: total minus a chosen number
Winning Margin	The exact goal difference between the teams	Sign matters: home by 2 ≠ away by 2
Teams to Score / Clean Sheet	Which teams score; which teams keep a clean sheet	Team-level building blocks used by many combos
Win to Nil	A team wins **and** concedes nothing	Manual spelling: "Win to Nill"

The Asian Handicap settlement table — in full

The manual settles Asian Handicap from a master table: your team's handicap against your team's actual result. Every line, both directions, transcribed whole — this is the table the one-line summary in §6 above was compressing. A minus handicap means your team gives the start; plus means it receives it.

Handicap on your team	Your team's result	Bet settles
0	Win	Win
0	Draw	Void (stake back)
0	Lose	Lose
−0.25	Win	Win
−0.25	Draw	Half lose
−0.25	Lose	Lose
+0.25	Win	Win
+0.25	Draw	Half win

Handicap on your team	Your team's result	Bet settles
+0.25	Lose	Lose
−0.5	Win	Win
−0.5	Draw	Lose
−0.5	Lose	Lose
+0.5	Win	Win
+0.5	Draw	Win
+0.5	Lose	Lose
−0.75	Win by 2+	Win
−0.75	Win by 1	Half win
−0.75	Draw	Lose
−0.75	Lose	Lose
+0.75	Win	Win
+0.75	Draw	Win
+0.75	Lose by 1	Half lose
+0.75	Lose by 2+	Lose
−1	Win by 2+	Win
−1	Win by 1	Void
−1	Draw	Lose
−1	Lose	Lose
+1	Win	Win
+1	Draw	Win
+1	Lose by 1	Void
+1	Lose by 2+	Lose
−1.25	Win by 2+	Win
−1.25	Win by 1	Half lose
−1.25	Draw	Lose
−1.25	Lose	Lose
+1.25	Win	Win
+1.25	Draw	Win
+1.25	Lose by 1	Half win
+1.25	Lose by 2+	Lose
−1.5	Win by 2+	Win

Handicap on your team	Your team's result	Bet settles
−1.5	Win by 1	Lose
−1.5	Draw	Lose
−1.5	Lose	Lose
+1.5	Win	Win
+1.5	Draw	Win
+1.5	Lose by 1	Win
+1.5	Lose by 2+	Lose
−1.75	Win by 3+	Win
−1.75	Win by 2	Half win
−1.75	Win by 1	Lose
−1.75	Draw	Lose
−1.75	Lose	Lose
+1.75	Win	Win
+1.75	Draw	Win
+1.75	Lose by 1	Win
+1.75	Lose by 2	Half lose
+1.75	Lose by 3+	Lose
−2	Win by 3+	Win
−2	Win by 2	Void
−2	Win by 1	Lose
−2	Draw	Lose
−2	Lose	Lose
+2	Win	Win
+2	Draw	Win
+2	Lose by 1	Win
+2	Lose by 2	Void
+2	Lose by 3+	Lose

The pattern underneath the table: whole lines can void, half lines never split, and quarter lines are two half-bets in one — half the stake on the line above, half on the line below (e.g. −0.75 = half on −0.5, half on −1.0). The same split logic drives the quarter rows of the Over/Under table in §4.

7. Halves

Every core idea repeats per half, and a half is settled **only on goals within that half** (the second half starts 0–0 for betting purposes):

- 1st Half / 2nd Half versions of: 1X2, Double Chance, Draw No Bet, Handicap, Asian Handicap, Over/Under, GG/NG, Correct Score, team totals, exact goals, odd/even, clean sheets.
- **Which Team Will Win the Rest (of the half/match):** from the moment of betting, only goals scored after that moment count — the score effectively restarts at 0–0.
- **Highest Scoring Half:** which half produces more goals (1st / 2nd / equal), also per team.
- **Win Both Halves / Win Either Half:** a team must outscore the opponent in both halves, or in at least one.

8. Corners and bookings

Corners settle on corners **taken** — awarded-but-not-taken corners do not count, and a re-taken corner counts once. Markets: total Corners Over/Under, Corners 1X2 (which team takes more), per-team totals, Corner Handicap, Corner Range, Nth Corner, Last Corner, Race to X Corners, odd/even — plus half and 5/10/15-minute interval versions of the same ideas.

Bookings counting, from the manual — as a table, the way the book itself counts:

Card event	Counts as cards	Booking points
Yellow card	1	10
Red card (straight, or second-yellow red)	2	25
The second yellow itself	Not double-counted	—
Maximum one player can cause	**3 cards**	**35 points**

Cards shown after the final whistle, and cards for non-players (bench, manager, substituted players), do not count; a card shown during the half-time break counts in the second half. Markets: Total Bookings (cards) Over/Under, Booking Points Over/Under, Bookings 1X2, 1st Booking (Home / None / Away), Exact Bookings, Sending Off (per team too), booking handicaps — plus half and interval versions.

9. Player markets

All player markets settle on **Opta** definitions. The manuals spell out exactly what each statistic counts — this is the ground truth every player line settles on:

Statistic	Counts	Does count
Player Total Shots	Any clear attempt to score: on target, off target, blocked (by anyone), off the woodwork; any legal body part	Set-piece attempts with no clear scoring intent that don't directly produce a goal (e.g. a crossed corner); cross-cum-shots / flick-ons with no clear intent
Player Total Shots On Goal	Attempts that score (whatever the intent); clear attempts that would have gone in but for a goalkeeper save or a **last-man** stop; woodwork shots that go straight in	Blocked shots by anyone other than the last man; woodwork shots that stay out; no-intent set pieces / crosses as above

Statistic	Counts	Does count
Player Total Passes	Attempted passes (completed or not) with clear intention to find a teammate, incl. short-played goal kicks, free kicks and corners	Crosses, throw-ins, goalkeeper throws
Player Tackles	Ground challenges where the player connects with the ball and takes it from a player clearly in possession — whatever the outcome (possession won, ball out, ball to an opponent)	Missed/failed tackle attempts, aerial duels, fouls, interceptions
Player Assists	The final contribution (pass, shot, any touch) that leads directly to the receiving teammate's goal	Deflected contributions the recipient was unlikely to reach without the deflection; assists on own goals, penalties, direct corners, direct free kicks. **Pre-assists never count** (MLS rule stated in the manual: the pass before the assist is not an official assist and is ignored)
Player Saves	Every goalkeeper interception of a shot on goal	—
Player Goals	Goals in the opposition net	An off-target attempt deflected in off an opponent (an own goal)

- **Participation rule:** if the player takes any part in the match, the bet stands — starter or substitute, however few minutes.
- **No-show rule:** if the player never enters, bets void — **except** a named list that voids if the player merely does not **start**: player shots, shots on goal, assists, tackles, passes, player-not-to-score, and player head-to-heads.
- **Goalscorer markets:** First / Anytime / Last goalscorer; to score 2+; score-or-assist; score-and-assist; method markets (header, free kick, foot). **Own goals never count** for Anytime or score-X markets — but an own goal **does** count as the First Goal for First Goalscorer settlement. If a match ends goalless, First Goalscorer player bets lose (the market's own "no goal" outcome is the winner).
- **Performance lines:** shots, shots on target (incl. from outside the box, per half, each half), passes, tackles, fouls, offsides, to be carded, first player booked.

10. Football.com's EarlyWin family (pre-match only)

A whole tab that exists **only before kickoff** on football.com (not in the SportyBet manual):

- **1X2 (1UP) / 1X2 (2UP)** and **Double Chance (1UP)** — as §6.
- **Over/Under (GoalRush):** you bet **Over only**; the bet is paid immediately if the goals arrive early on a fixed ladder (per the manual's EarlyGoals definition: Over 1.5 needs 1 goal by 10′, Over 2.5 needs 2 by 30′, Over 3.5 needs 3 by 50′). If the early condition fails, the selection is **not lost** — it reverts to being a normal Over/Under bet for the full match.
- **Home/Away Over/Under (Early Goals)** and **(GoalRush)** — the same idea scoped to one team.
- **To Lead by 1 / 2 / 3 Goals at Any Time** — the team reaches that lead at any point.

11. Combination markets

The site builds two-leg ideas into single selections. The recurring grammar: **"A or B"** wins if either leg lands; **"A & B"** needs both.

- **1X2 & Over/Under**, **1X2 & GG/NG**, **Double Chance & Over/Under**, **Double Chance & GG/NG**, **Over/Under & GG/NG**, **HT/FT & Over/Under** — the paired markets, both legs must land (& versions).
- **Home/Draw/Away Team or …** — e.g. "Home Team or Over 2.5", "Draw or GG/NG", "Away Team or Any Clean Sheet": wins if the result leg or the goals leg lands.

12. Live vs pre-match — the map that matters

Observed on the same day: a live Premier League match showing **241 markets** (falling as windows settle) and a pre-match Serie A match showing **881** (every line variant counted). Named blocks: ~130 live, ~142 pre-match — but the families differ:

Live only	Pre-match only
All rolling interval markets (1X2, 1st goal, Over/Under at 5/10/15 min)	The entire **EarlyWin** tab (1UP/2UP/DrawSave/GoalRush/EarlyGoals)
Cumulative totals "from 1 to X minute"	1st Booking, Exact Bookings
Rest of the Match, Win From Behind	Goal in Both Halves, Goal Bounds, Excluded Number of Goals
Exact Goals, Odd/Even (match), Home/Away No Bet	Full player-prop depth (assists, passes, tackles, not-to-score…)
Fouls markets (Fouls 1X2, Fouls Over/Under, team fouls)	Team posts/crossbars, team offsides, substitution markets
2nd-half market set (grows as the match ages)	1st-half everything (dies at half-time)

Both sides share: 1X2 and variants, all Over/Under lines, Double Chance, handicaps, GG/NG, correct score, team totals, corners and bookings cores, goalscorer markets, and the Minutes tab's two first-goal interval markets.

13. Traps this handbook now guards against

1. **The two Nones** (§5). Always name the market, not just the selection.
2. **Window ≠ line** (§2). Minutes live in titles; 0.5 counts goals.
3. **"It doesn't exist" is a live-vs-pre-match claim.** The early no-goal family is invisible until kickoff. No market is declared absent until the live list has been checked.
4. **Padlocks are normal.** Markets suspend briefly around goals, dangerous attacks and half-time, and settled windows lock/disappear. A locked market is not a broken site.
5. **The manuals have gaps and typos.** "None" is defined nowhere; the 15-minute first-goal market has no manual heading; football.com's manual mis-defines "Draw or GG/NG" (copied from the Home Team version) and repeats 1UP text inside its EarlyGoals section. When the manual and the market's own structure disagree, structure and observed settlement win.
6. **Feed dependence.** Lower-league matches may carry no minute markets at all (§3). Check the specific match, every time.

14. Our staking protocol (standing)

1. The model chooses the play by **percentage** — never by the bookmaker's price.
2. Before any stake, the exact **market name + selection + settlement** is stated and matched against this handbook (e.g. 15 minutes - 1st goal from 1 to 15 → None; settles at 15:00).
3. Stakes are singles, at the owner's exact amounts, on football.com only, unless the owner rules otherwise for that bet.
4. Every result — right or wrong — is settled into the Predict ledger and graded the next morning; the ratings learn from all of it.

15. Cup markets — overtime and penalty shootouts

Everything in §§1–14 settles on regular time. Knockout football adds two more universes, and the manuals give each its own full market set. These exist only in matches that allow them (cups); none of them touch a regular-time bet.

Qualification markets:

Market	Meaning
To Qualify	Which team advances to the next round — by whatever method the tie produces
Will There Be Overtime	Whether extra time is played at all
Winning Method	The winning team **and** how they win it; in a multi-leg tie the combined result of all legs is used
Overtime & Goal	Yes = there is overtime **and** a goal in it; No = no overtime, or overtime without a goal

Overtime markets (settled only on the extra-time period itself):

Market	Meaning
Overtime – 1X2	Winner of the overtime period
Overtime – Handicap	Overtime result with the handicap applied
Overtime – Over/Under	Total overtime goals vs a line (settles on the §4 grid)
Overtime – Nth Goal	Which team scores the Nth overtime goal
Overtime – Correct Score	Exact overtime score
Overtime – Which Team Will Win the Rest	From the moment of betting, only later overtime goals count
Overtime 1st Half – 1X2 / Overtime 1st Half – Handicap / Overtime 1st Half – Correct Score	The same three ideas scoped to the first half of overtime

Penalty shootout markets (settled only on the shootout):

Market	Meaning
Penalty Shootout – Winner	Which team wins the shootout

Market	Meaning
Penalty Shootout – Winner & Over/Under	Shootout winner **and** total shootout goals vs a line
Penalty Shootout – Winning Margin	By how many goals the shootout is won
Penalty Shootout – Over/Under	Total shootout goals vs a line
Penalty Shootout – Exact Goals	Exact total of shootout goals
Penalty Shootout – Odd/Even	Total shootout goals odd or even
Penalty Shootout – Nth Penalty Scored	Whether the Nth penalty is scored
Penalty Shootout – Nth Goal	Which team scores the Nth shootout goal
Penalty Shootout – Home Over/Under / Penalty Shootout – Away Over/Under	One team's shootout goals vs a line
Penalty Shootout – Home Odd/Even / Penalty Shootout – Away Odd/Even	One team's shootout goals odd or even (no goals = even)
Penalty Shootout – Correct Score	Exact shootout score
Nth Penalty Scored (match market)	Whether the Nth in-match penalty is scored — a different market from the shootout version above

16. The A–Z index — every market in the manuals

Every market heading carried in the two manuals (SportyBet Nigeria + football.com — the same document family), grouped by family, one line each. If a market exists in the book, it is here; the sections above give the deep settlement rules for the families that have them. Pattern variants (Home/Away, 1st/2nd half, interval versions) are named in full.

Result markets

Market	You are predicting
1X2	Home / Draw / Away in regular time
1X2 – 1UP / 2UP	Your team paid as winner the moment it leads by 1 / by 2 (see §6); team versions: Home team 1UP, Home team 2UP, Home team 3UP, Away team 1UP, Away team 2UP, Away team 3UP, Any team 3UP
1X2 – Never Down	Your team wins without ever trailing (see §6)
Double Chance	Two of the three results in one pick: 1X, 12, X2
Double Chance 1UP	Double Chance paid early the moment your team leads at any point; otherwise settles as a normal Double Chance
Draw No Bet	Match winner; a draw voids
Home No Bet	Match result; a home win voids
Away No Bet	Match result; an away win voids
Handicap (European, 3-way)	Winner after the bracketed goal start is added to a team's score
Asian Handicap	Winner against a split-capable handicap (full table in §6)

Market	You are predicting
Half Time/Full Time	The result at half-time **and** at full-time, one selection
Half Time/Full Time Correct Score	The correct score at half-time **and** at full-time
Rest Match Winner	The result from the moment of betting — the score restarts 0–0
To Qualify	Which team advances (see §15)
Winning Method	Winning team and method (see §15)
Winning Margin	The exact goal difference of the win
Nth Goal & 1X2	Which team scores the Nth goal **and** who wins the match

Goal totals

Market	You are predicting
Over/Under	Total goals vs a line (full settlement table in §4)
Home Team Over/Under / Away Team Over/Under	One team's total goals vs a line
Exact Goals	The exact total goals (0, 1, 2, 3, 4, 5+)
Home Team Exact Goals / Away Team Exact Goals	One team's exact total
Multigoals	How many goals will be scored, in the book's bands
Home Multigoals / Away Multigoals	One team's goal band
Multiscores	The final score, chosen from grouped scorelines
Goal Range	Total goals inside a chosen range
Goal bounds / Goal bounds - Home / Goal bounds - Away / Goal bounds - 1st Half	Total goals of the named scope fall inside a set goal range
Excluded goals / Excluded goals - Home / Excluded goals - Away / Excluded goals - 1st Half	A bet **against** a specific number of goals — that exact total must not happen
Odd/Even	Total goals odd or even; no goals counts as even
Home Team Odd/Even / Away Team Odd/Even	One team's goals odd or even (0 = even)
Both Halves Over x.5	Goals in **each** half finish over the given line
Both Halves Under x.5	Goals in **each** half finish under the given line

Scoring, teams and clean sheets

Market	You are predicting
GG/NG	Both teams score (GG) or at least one doesn't (NG) — see §6
1st/2nd Half GG/NG	GG/NG scoped to the named half
Teams to Score	

Market	You are predicting
	Which team(s) will score: home only, away only, both, neither
Home Team Clean Sheet / Away Team Clean Sheet	The named team concedes nothing
Home Team to Win to Nill / Away Team to Win to Nill	The named team wins **and** keeps a clean sheet (manual spelling)
Win to Nil	A team wins and concedes nothing (see §6)
Home Team to Score Both Halves / Away Team to Score Both Halves	The named team scores at least once in each half
1st Goal	Which team scores the match's first goal — or None (see §5)
Next Goal	Which team scores the Nth goal
Last Goal	Which team scores the match's last goal
Next Scoring Type	The kind of the next goal (full definitions in §5)
Correct Score	The exact full-time score

Goal timing and intervals

Market	You are predicting
When Will the Nth Goal Be Scored (10 min interval)	The 10-minute interval in which the Nth goal lands
When will the 1st goal be scored (10 / 15 min interval)	The interval of the first goal — or None = a goalless match (see §5)
5/10/15 minutes – 1X2 from a to b	The result inside that minute window (see §3)
1X2 – Intervals of 10 Minutes	The cumulative 1X2 from minute 1 to each 10-minute boundary (see §3)
5/10/15 minutes – Nth Goal from a to b	Which team scores the Nth goal inside the window (or None)
5/10/15 minutes – Over/Under from a to b	Total goals inside the window vs a line — Under 0.5 = the no-goal play (see §3)
Total Goals Over/Under from 1 to X minute	Cumulative goals by minute X vs a line (live only, see §3)
1 minute – Over/Under from a to b	Total goals inside a single named minute vs a line
1 minute – Over/Under Corners from a to b	Corners inside one minute vs a line
1 minute – Over/Under Bookings from a to b	Bookings inside one minute vs a line
1 minute – Over/Under Offsides from a to b	Offsides inside one minute vs a line
1 minute – Over/Under Penalties from a to b	Penalties inside one minute vs a line

Halves

Market	You are predicting
1st Half – 1X2 / 2nd Half – 1X2	The named half's result, on that half's goals only
1st Half – Double Chance / 2nd Half – Double Chance	Double Chance within the half
1st Half – Draw No Bet / 2nd Half – Draw No Bet	Half winner; a drawn half voids
1st Half – Handicap / 2nd Half – Handicap	Half winner with the bracketed start
1st Half – Over/Under / 2nd Half – Over/Under	Total half goals vs a line
1st Half – Home Team Over/Under / 1st Half – Away Team Over/Under	One team's 1st-half goals vs a line
2nd Half – Home Team Over/Under / 2nd Half – Away Team Over/Under	One team's 2nd-half goals vs a line
1st Half – Exact Goals / 2nd Half – Exact Goals	Exact goals in the half
1st Half – Home Team Exact Goals / 1st Half – Away Team Exact Goals	One team's exact 1st-half goals
1st Half – Correct Score / 2nd Half – Correct Score	Exact score of the half
1st Half – Multigoals / 2nd Half – Multigoals	Goal band of the half
1st half – Odd/Even / 2nd Half – Odd/Even	Half goals odd or even (0 = even)
1st Half – GG/NG / 2nd half – GG/NG	Both teams score inside the half
1st half – Home Team Clean Sheet / 1st half – Away Team Clean Sheet	Clean sheet in the 1st half
2nd Half – Home Team Clean Sheet / 2nd Half – Away Team Clean Sheet	Clean sheet in the 2nd half
1st Half – Which Team Will Win the Rest	The rest of the 1st half from the moment of betting, score restarted
1st Half – Nth Goal / 2nd Half – Nth Goal	Which team scores the Nth goal of the half
Home Team to Win Both Halves / Away Team to Win Both Halves	The named team outscores the opponent in **both** halves
Home Team to Win Either Half / Away Team to Win Either Half	The named team wins at least one half
Highest Scoring Half	Which half produces more goals (1st / 2nd / equal)
Home Team Highest Scoring Half / Away Team Highest Scoring Half	The half in which the named team scores most

Corners

Market	You are predicting
Corners – 1X2	Which team takes more corners (corners count when taken — §8)

Market	You are predicting
Nth Corner / Last Corner	Which team takes the Nth / the last corner
Corner Handicap	Most corners with the bracketed start
Corners – Over/Under	Total corners vs a line
Home Team Corners – Over/Under / Away Team Corners – Over/Under	One team's corners vs a line
Corner Range / Home Team Corner Range / Away Team Corner Range	Corners fall inside a range (match or one team)
Odd/Even Corners	Total corners odd or even (0 = even)
Race to X Corners	Which team reaches X corners first
1st Half – Corner 1X2 / 1st Half – Nth Corner / 1st Half – Last Corner / 1st Half – Corner Handicap	The corner markets scoped to the 1st half
1st Half Corners – Over/Under / 1st Half – Home Corners Over/Under / 1st Half – Away Corners Over/Under	Corner totals vs lines, 1st half
1st Half – Home Exact Corners / 1st Half – Away Exact Corners	One team's exact 1st-half corners
1st Half – Corner Range / 1st Half – Odd/Even Corners	Range / odd-even of 1st-half corners
1st Half – Race to X Corners	First to X corners inside the 1st half
5/10/15 minutes – Corners 1X2 from a to b	Most corners inside the window
5/10/15 minutes – Xth Corner from a to b	Which team takes the Xth corner inside the window
5/10/15 minutes – Corner Handicap from a to b	Window corner winner with a start
5/10/15 minutes – Corners – Over/Under from a to b	Window corner total vs a line
5/10/15 minutes – Home Corners – Over/Under from a to b / 5/10/15 minutes – Away Corners – Over/Under from a to b	One team's window corners vs a line
5/10/15 minutes – Odd/Even Corners from a to b	Window corners odd or even

Bookings

Counting law for the whole family is the table in §8 (yellow 1 card / 10 pts, red 2 / 25, max 3 / 35 per player).

Market	You are predicting
Booking 1X2	Which team receives more bookings
1st Booking	Which team is booked first — Home / None / Away
Nth Booking	Which team receives the Nth booking
Total Bookings	

Market	You are predicting
	Total bookings (cards) vs a line
Total Booking Points	Total booking points vs a line
Home Team Total Bookings / Away Team Total Bookings	One team's bookings vs a line
Exact Bookings / Home Team Exact Bookings / Away Team Exact Bookings	The exact number of bookings (match or one team)
Booking Point Range	Total booking points fall inside a range
Sending Off / Home Team Sending Off / Away Team Sending Off	A player is sent off (match, or for the named team)
1st Half – Booking 1X2 / 1st Half – Nth Booking / 1st Half – Total Booking Points / 1st Half – Total Bookings	The booking markets scoped to the 1st half
1st Half – Home Team Total Bookings / 1st Half – Away Team Total Bookings	One team's 1st-half bookings vs a line
1st Half – Exact Bookings / 1st Half – Home Team Exact Bookings / 1st Half – Away Team Exact Bookings	Exact 1st-half bookings (match or one team)
1st Half – Booking Point Range / 1st Half – Sending Off / 1st Half – Home Team Sending Off / 1st Half – Away Team Sending Off	Range and sendings-off, 1st half
5/10/15 minutes – Booking 1X2 from a to b	More bookings inside the window
5/10/15 minutes – Total Bookings from a to b	Window bookings vs a line
5/10/15 minutes – Sending Off from a to b / 5/10/15 minutes – Home Team Sending Off from a to b / 5/10/15 minutes – Away Team Sending Off from a to b	A sending-off inside the window

Player markets

Settlement starts from the stat definitions in §9 and the participation / no-start rules there. Every market below is per named player.

Market	You are predicting
First Goalscorer / Anytime Goalscorer / Last Goalscorer / Nth Goalscorer	The player scores the first / any / last / Nth goal (own goals: §9)
First To Score for Their Team	The player scores his team's first goal
To Score in First 10 Mins	The player scores inside the first 10 minutes
Player To Score In 1st Half / Player To Score In 2nd Half / Player To Score in Both Halves	The player scores in the named half / in each half
Player to Score 2+ / To Score or Assist / To Score and Assist	The player's goal-assist combinations

Market	You are predicting
To Score a Header / Player To Score a Free-Kick	The goal is scored with a header / from a direct free kick
Player To Score with Right Foot / Player To Score with Left Foot	The goal is scored with the named foot
Player Score from Outside Box	The goal is scored from outside the area
Player Goals / Player Assists	The player scores / assists at all in regular time (lines versions exist as totals)
Player Shots / Player Total Shots	The player's total shots vs a line (definition: §9)
Player Shots on Target / Player Total Shots On Goal	Shots on target vs a line
Player Shots on Target from Outside Box	SoT from outside the box vs a line
Player Right Foot Shots on Target / Player Left Foot Shots on Target	SoT with the named foot vs a line
Player 1st Half Shots on Target / Player 2nd Half Shots on Target / Player Shots on Target Each Half	SoT in the named half / in each half
Player Total Attempted Passes / Player Total Passes / Player Passes	Attempted passes vs a line (definition: §9)
Player Tackles / Player Total tackles	Tackles vs a line (definition: §9)
Player Fouls	Fouls committed vs a line
Player Offsides	Offsides vs a line
Player Steals	Steals vs a line
Player Saves	Goalkeeper saves vs a line
Player To Be Carded / First Player Booked	The player is carded / is the first player carded
Player Not to Score	The player does **not** score (voids if he doesn't start — §9)
Player H2H	One named player out-performs another on the paired stat (voids if either doesn't start — §9)
Posts and Crossbars (player/team)	Shots hitting woodwork — a woodwork shot that goes in counts as a goal, not woodwork

Combination markets

The "&" family needs **both** legs; the "or" family needs **either** leg (see §11).

Market	Legs
1X2 & GG/NG	Result + both teams score
1X2 & Over/Under	Result + total goals vs a line
Over/Under & GG/NG	Total goals line + both teams score
Double Chance & GG/NG / Double Chance & Over/Under	

Market	Legs
	Double Chance + the named second leg
Double Chance & 1st Half GG/NG / Double Chance & 2nd Half GG/NG	Double Chance (match) + GG/NG in the named half
1st Half – Double Chance & GG/NG / 2nd Half – Double Chance & GG/NG	Half Double Chance + half GG/NG
1st Half – 1X2 & GG/NG / 1st Half – 1X2 & Over/Under	1st-half result + the named second leg
2nd Half – 1X2 & GG/NG / 2nd Half – 1X2 & Over/Under	2nd-half result + the named second leg
Half Time/Full Time & Over/Under	HT/FT + match total vs a line
Half Time/Full Time & 1st Half Over/Under	HT/FT + 1st-half total vs a line
Half Time/Full Time & Exact Goals	HT/FT + exact match goals
Home Team or Over Goals / Home Team or Under Goals	Home win **or** the goals line lands
Draw or Over Goals / Draw or Under Goals	Draw **or** the goals line lands
Away Team or Over Goals / Away Team or Under Goals	Away win **or** the goals line lands
Home Team or GG/NG / Draw or GG/NG / Away Team or GG/NG	The result leg **or** both teams score
Home Team or Any Clean Sheet / Draw or Any Clean Sheet / Away Team or Any Clean Sheet	The result leg **or** either team keeps a clean sheet

Overtime and penalty shootouts

The full family is tabled in §15: Overtime & Goal, Overtime – 1X2, Overtime – Nth Goal, Overtime – Over/Under, Overtime – Handicap, Overtime – Correct Score, Overtime – Which Team Will Win the Rest, Overtime 1st Half – 1X2 / Overtime 1st Half – Handicap / Overtime 1st Half – Correct Score, Will There Be Overtime, and the twelve Penalty Shootout markets (Winner, Winner & Over/Under, Winning Margin, Over/Under, Exact Goals, Odd/Even, Nth Penalty Scored, Nth Goal, Home/Away Over/Under, Home/Away Odd/Even, Correct Score).

EarlyWin (football.com, pre-match only)

The full family is tabled in §10: 1X2 (1UP), 1X2 (2UP), team 1UP/2UP/3UP, Double Chance (1UP), DrawSave, Over/Under (GoalRush), Over/Under EarlyGoals (the football.com manual's name for the early ladder — Over 1.5 needs 1 goal by 10′, Over 2.5 needs 2 by 30′, Over 3.5 needs 3 by 50′), Home/Away Over/Under EarlyGoals, and To Lead by 1 / 2 / 3 Goals at Any Time.
